SOLAR LED street lighting

JOLIET

Solar powered LED street lights

The latest advances in high power LED modules coupled with ultra efficient photovoltaic panels offers a new generation of energy efficient, pollution free street lighting solutions.

The Joliet solar streetlight is dimensioned to customer requirements and provides a cost effective solution for new, cable free, installations using high power LED 'Masthead' light sources, and custom made tubular supports for street lighting, facade illumination and billboard applications.

Other LED products from Joliet Technology include: replacement LED bulbs for existing street lights, tunnel lights suitable for all underground applications and LED masthead lighting systems.
